Subject: No Budget Increase

There should be no budget increase until the pandemic is over, and it is far from over!
People are hurting financially and you want to raise taxes??? Unacceptable!!!! You need to hold back on any tax increase until your fellow townspeople are back to work and have financial security once again.

Please rethink this!
Thank You
Steve Coolidge

Subject: 2021-22 town Budget - Conservation Commission

As the Town Council continues its deliberations on trimming the town budget for next year, we ask you not cut any of the \$2500 currently planned for our Conservation Commission.

We have some new energy, community volunteers and active KCC members. Some of the activities in process: Commissioner Jean Mountford is leading the trail blazing at our Litchfield Avenue conservation property in Rogers. Three community volunteers from Griffiths Road are spending lots of time expanding our trail system at our Quandoc property near the transfer station. At our April 21st meeting an area conservation lawyer is presenting information on conservation easements (you can watch it on line). Another open space public property is in the works; you'll be hearing more about that soon.

We have active, committed town volunteers; please keep our funding intact.

Donna Bronwell, 20 year Conservation Commission chair
