Good afternoon all,

I just spoke with Dean to go over the responses.

Access will need to be provided for the detention basin in order to allow for cleaning and general maintenance.

This can certainly be a condition of approval.

Otherwise all of my concerns have been addressed.

Thank you and please call with any questions.

Importance: High

Good afternoon Mr. Capacchione,

Please find enclosed our responses to your comments.

Jonathan – some of the Engineering Department comments will be addressed with a revision to the site plans. We would consider those comments to be fairly minor in nature and would request the Inland Wetlands and Watercourses Commission consider a condition of approval to address those comments with staff.

Thank you for consideration of our responses and please feel free to contact me with any further questions or comments.

Thank you,

Dean
